ELECTION WITH TRAVERSE:

The Restriction Requirement alleges that the subject Application contains claims directed to the following two Groups of unrelated claimed inventions (9 June 2006 Office Action, Page 2):

Group I. Claims 1-28, drawn to a system, method, and program for generating a RFQ, classified in class 705, subclass 26.

Group II. Claims 29-31, drawn to a system, method, and program for generating a RFQ having a data and metrics model, a state transition model, and a user interface workflow, classified in class 705, subclass 26.

The Applicants elect, with traverse, to pursue Group II. Group II is directed to a system, method, and program for generating a RFQ having a data and metrics model, a state transition model, and a user interface workflow. The Applicants reiterate that the foregoing election is not acquiescence in the propriety of the restriction or in the accuracy in the determination and/or identification of the alleged "unrelated inventions" in the subject Application. The Applicants respectfully request withdrawal of the Restriction Requirement as set forth below, as the Requirement is improper.

The Applicants elect, with traverse to pursue Claims 29-31 (which are directed to a single species). The Applicants reiterate that the foregoing election is not an acquiescence in the propriety of the restriction or in the accuracy in the determination and/or identification of an alleged "species" in the subject Application. The Applicants respectfully request withdrawal of the Restriction Requirement as set forth below, as the Requirement is improper.
